

Vaccinate the Children, Save the Future

2017 Activities

The Problem: Hepatitis B Virus (HBV) is a major public health problem in India, second only to HIV/AIDS. The estimated HBV carrier rate in India is 4 percent, with a total pool of approximately 40 million carriers. The virus is blood-borne and spreads through bodily fluids. Although many people have access to most other vaccinations, Hepatitis B vaccinations are very expensive and are not easily accessible, especially in rural areas. **More than 600,000 Indians die each year due to complications from Hepatitis B.**

How We Help: CIF travels to schools in remote villages in the states of Bihar, and Uttar Pradesh, with plans of expansion to other states. There, CIF sets up clinics to offer free vaccinations to schoolchildren whose families cannot afford the price of a vaccination. Three doses of the vaccination offers a child lifelong protection against this disease. As a donor, you are helping to provide an underprivileged child with a healthy future. So far CIF has vaccinated more than 8365 children in 26 schools. CIF provided benefits to more than 1650 children in 2017 alone. For detail, please visit:

CIF's website www.CIFworld.org or www.dciwc.org
contact Mr. Duli Agarwal at 240-855- 3317
E-mail at Agarwalnp@msn.com for more information.

As of today, CIF has provided more than 25000 vaccinations (more than 8270 children) to poor children. CIF is operated from USA and donations received are sent to Buxar, Bihar, India from where local operations are conducted.
