

Vaccinate the Children, Save the Future

2015 Activities

The Problem: Hepatitis B Virus (HBV) is a major public health problem in India, second only to HIV/AIDS. The estimated HBV carrier rate in India is 4 percent, with a total pool of approximately 40 million carriers. The virus is blood-borne and spreads through bodily fluids. Although many people have access to most other vaccinations, Hepatitis B vaccinations are very expensive and are not easily accessible, especially in rural areas. **More than 600,000 Indians die each year due to complications from Hepatitis B.**

How We Help: CIF travels to schools in remote villages in the states of Bihar, and Uttar Pradesh, with plans of expansion to other states. There, CIF sets up clinics to offer free vaccinations to schoolchildren whose families cannot afford the price of a vaccination. Three doses of the vaccination offers a child lifelong protection against this disease. As donor with us, you are helping to provide an underprivileged child with a healthy future. So far CIF has vaccinated more than 5000 children in 22 schools. CIF is planning to vaccinate about 1300 children in 2016. For detail, please visit:

CIF's website www.CIFworld.org or contact Mr. Duli Agarwal at 240-855-3317/Agarwalnp@msn.com for more information.

As of today, CIF has provided more than 16600 vaccinations (more than 5500 children) to poor children. CIF is operated from USA and donations received are sent to Buxar, Bihar, India from where local operations are conducted. The following table describes the real services/benefits provided by the CIF from January 2015 to December 2015:

Location	Dates of Service	Description of Services/Benefits
